

Fresh B illustrative pair — GT texture quartile Q1

UID 00bc54b70fea4c94bf54bdb4d041522c | idx 38 | seed 80 | GT LapVar 0.004515
Selected before image inspection by GT-only stratum rule; display is an illustration, not a subgroup estimate.

LLH – GFL paired endpoint deltas

FG-CIEDE2000: +0.893 | FG-PSNR: -1.481 dB
FG-LPIPS: -0.0275 | GT-relative Laplacian error: -0.01211

Lower is better for CIEDE2000, LPIPS, and GT-relative Laplacian error; higher is better for PSNR.
All panels use the same six target views and unmodified frozen PNG outputs. No GT-based recoloring or correction is applied.
GT source-view IDs: [14, 15, 0, 16, 12, 13] | reverse rotation: True
Prediction hashes and target tensor identity are listed in B_GALLERY_SELECTION.csv.

Fresh B illustrative pair — GT texture quartile Q3

UID 0013d88f17a245b0bff5ebe713bd72ab | idx 6 | seed 48 | GT LapVar 0.023604
Selected before image inspection by GT-only stratum rule; display is an illustration, not a subgroup estimate.
