One frozen checkpoint · shared runner and inference protocol

C3 − GFL FG-PSNR

+0.522 dB

95% CI
[+0.404, +0.641]

Counter-results retained

GFH and Generic Linear have more favorable means than C3 on all four displayed endpoints.

C3–GFL changes applied deep/middle scale sums; its estimate is not timing-only.

Image-space endpoints do not establish baked-texture, seam, PBR, unseen-view, or human-preference quality.
